INTRODUCTION

Event Volunteering has becoming popular way for organization to contribute to thier local community. this presentation will discuss the many benefits an event volunteering system can provide.

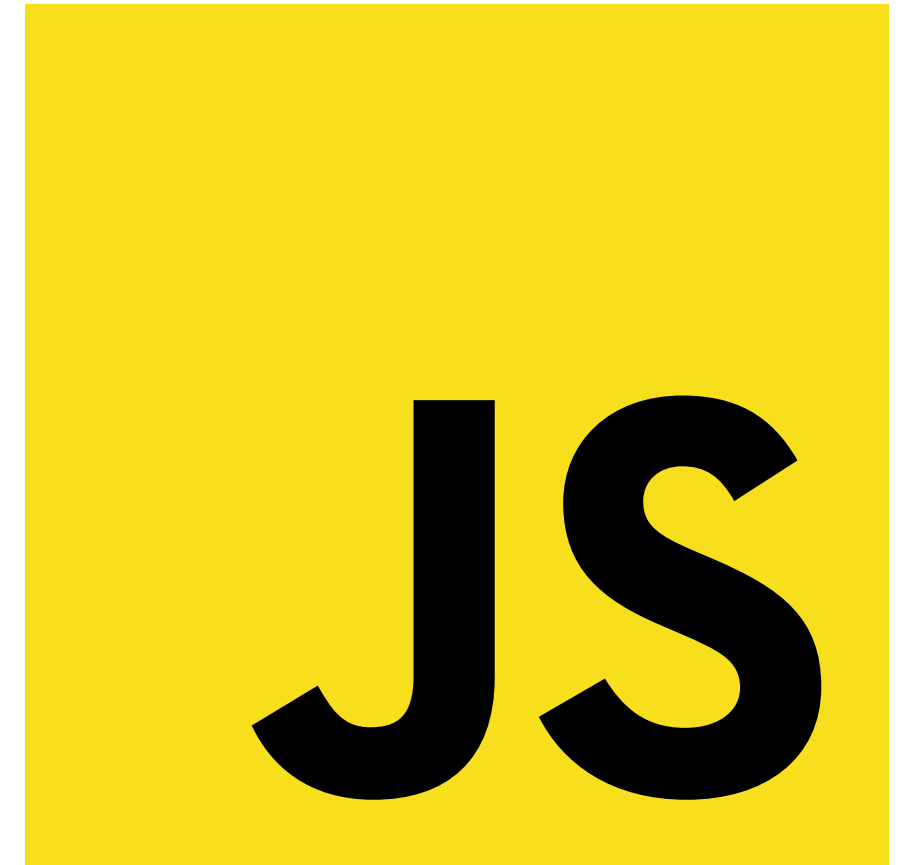

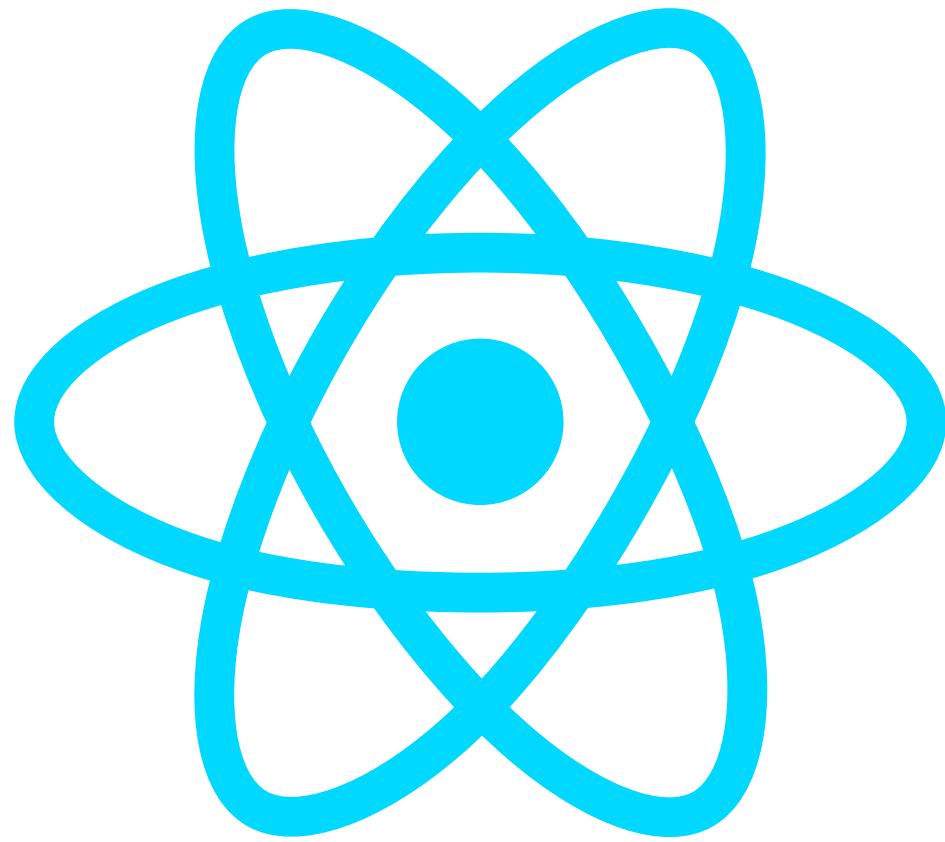

PROBLEM STATEMENT

Volunteer management is a critical aspect of many organizations, as it helps to ensure that volunteers are utilized effectively and that their contributions are maximized.

organizations may have limited visibility into volunteer engagement and impact, making it difficult to measure the success of their programs.

The Major problem is volunteer could not get thier entire money because of there are multiple person in between

Tech Stack

HOW AN EVENT VOLUNTEERING SYSTEM CAN

An event volunteering system can save you time and money by making it easier to recruit volunteers, create schedules and manage the event by optimizing workflow and resources. It automates laborious manual tasks, allowing you to focus more on customer experience and deliver long-term value. Also, it reduces recruitment costs, boosts productivity, and boosts employee morale.

CONTINUE...

Track Your Volunteers event volunteering system can help you plan and track your volunteers more efficiently. You'll have accurate records of who is available to work and their schedules, so it's easier to allocate tasks and plan shifts. The system can even compile reports of how many volunteers have worked and how many students have participated in the event

DataBase

The screenshot displays the Firebase Authentication console for the 'Event Management System' project. The left sidebar contains navigation links for Project Overview, Authentication, Firestore Database, and various product categories like Build, Release & Monitor, Analytics, and Engage. The main content area is titled 'Authentication' and includes tabs for Users, Sign-in method, Templates, Usage, Settings, and Extensions. The 'Users' tab is active, showing a table of users with columns for Identifier, Providers, Created, Signed In, and User UID. A search bar at the top of the table allows filtering by email address, phone number, or user UID. The table lists seven users, all created between March 15 and April 26, 2023. The bottom of the screen shows a Windows taskbar with various application icons, system tray icons, and a clock indicating 12:55 on 30-04-2023.
